v2.0 — Open Source

GrafanaProbe

Validate Every Layer of Your Grafana Stack

by Gopal Rao · Senior Platform Engineer

github.com/gpadidala/grafana-k6-ui-tester

The Problem

Grafana upgrades break things silently.

A failed plugin. A broken datasource. A missing variable.
You don't find out until 3 AM when your dashboards are dark.

📉

Broken Panels
Plugin upgrades silently fail mid-render

🚨

Stale Data
Datasource pipelines down with no alert

🔥

Cascade Failures
One bad config breaks N dashboards

The Solution

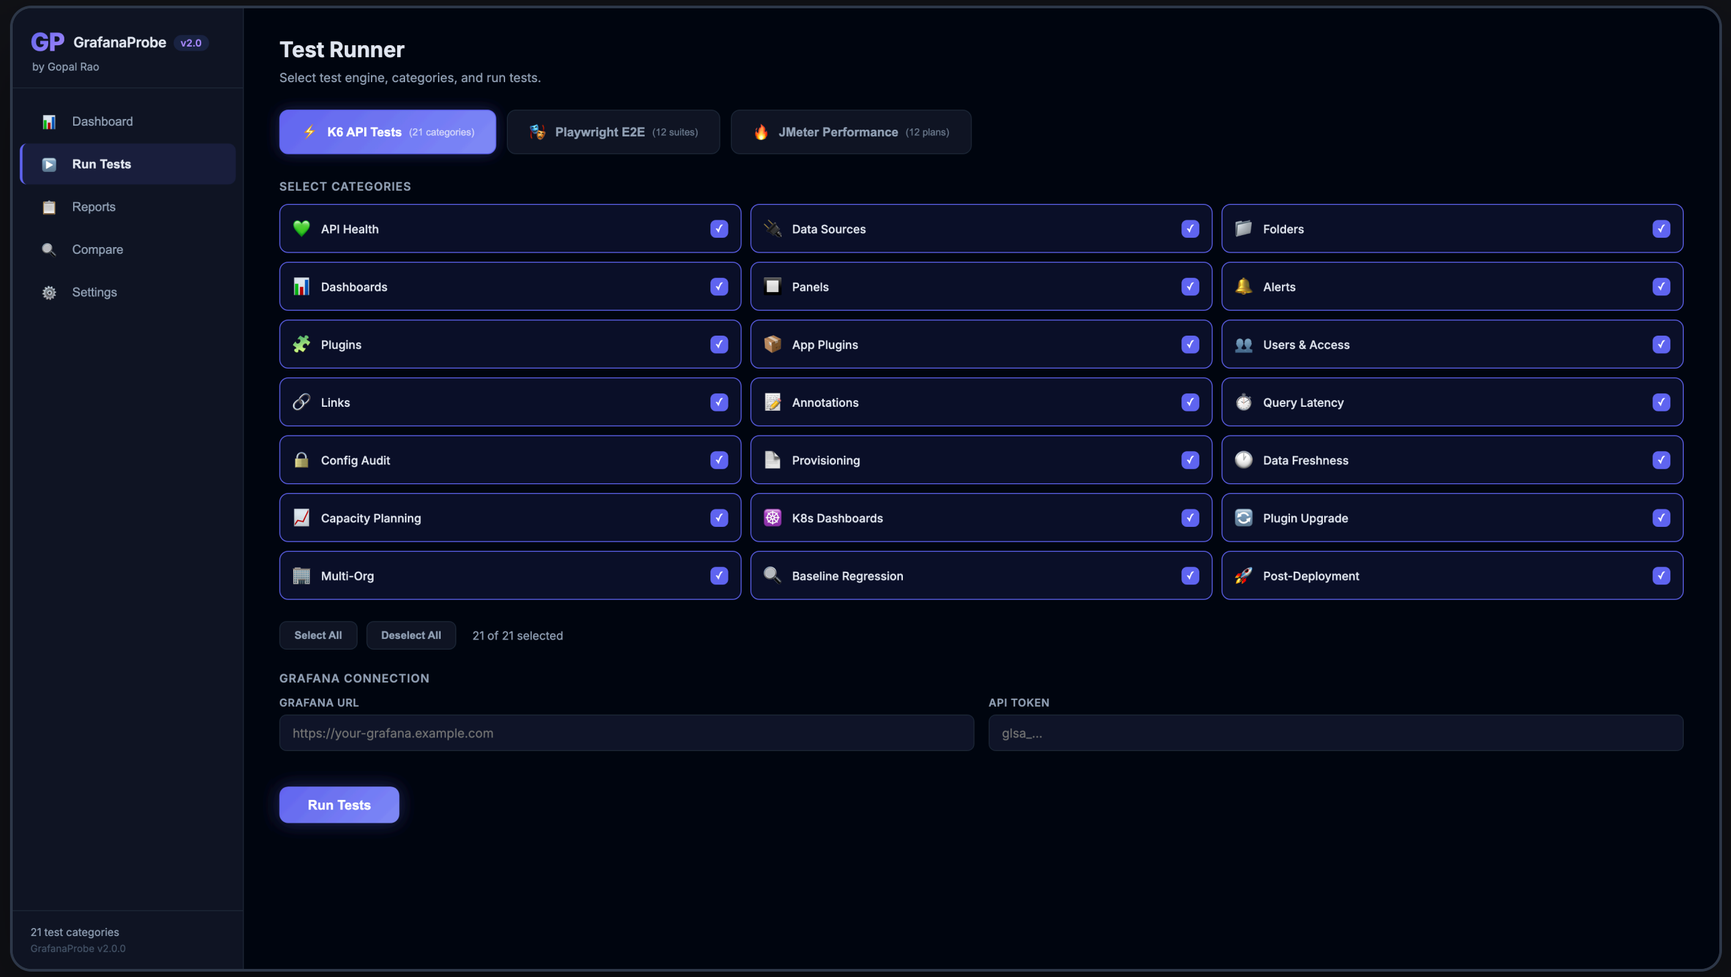
17 Test Categories.
One Command.

Auto-discovers your entire Grafana instance and validates every layer.

- 💚 API Health
- 🔌 Data Sources
- 📁 Folders
- 📊 Dashboards
- 🔲 Panels
- 🔔 Alerts
- 🧩 Plugins
- 📦 App Plugins
- 👥 Users & RBAC
- 🔗 Links
- 📝 Annotations
- ⏱️ Query Latency
- 🔒 Config Audit
- 📄 Provisioning
- 🕐 Data Freshness
- 📈 Capacity Planning

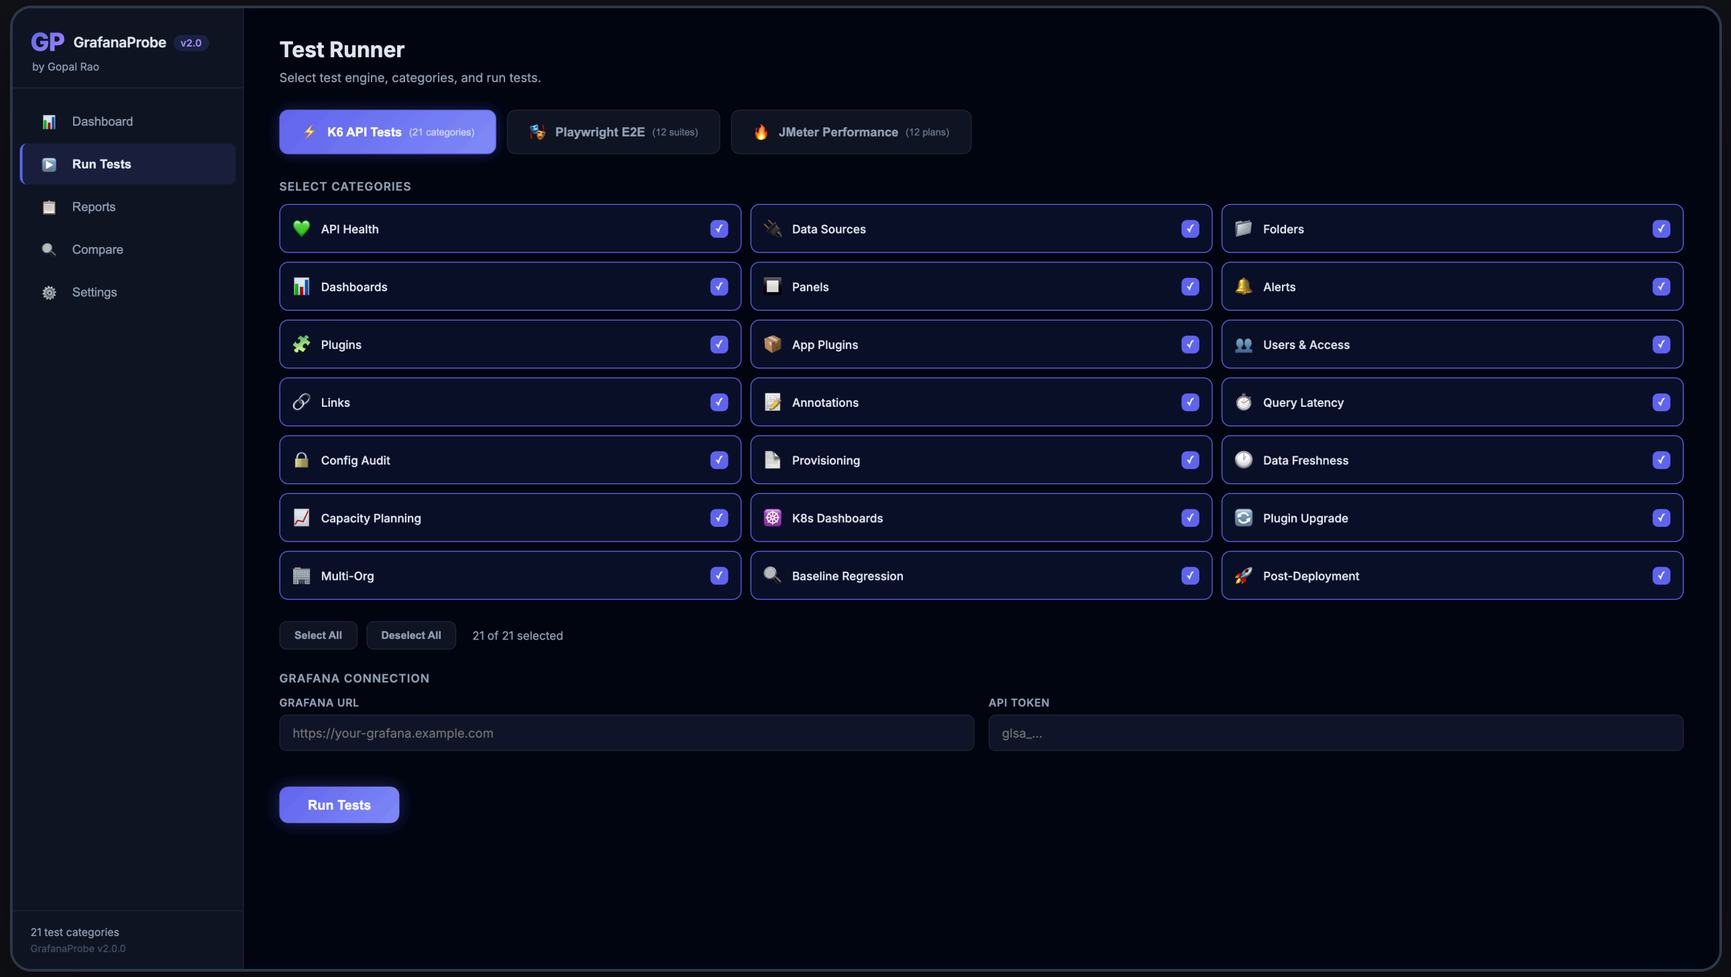
Pick categories. Hit Run.

Select any of 17 categories or all of them — one click.



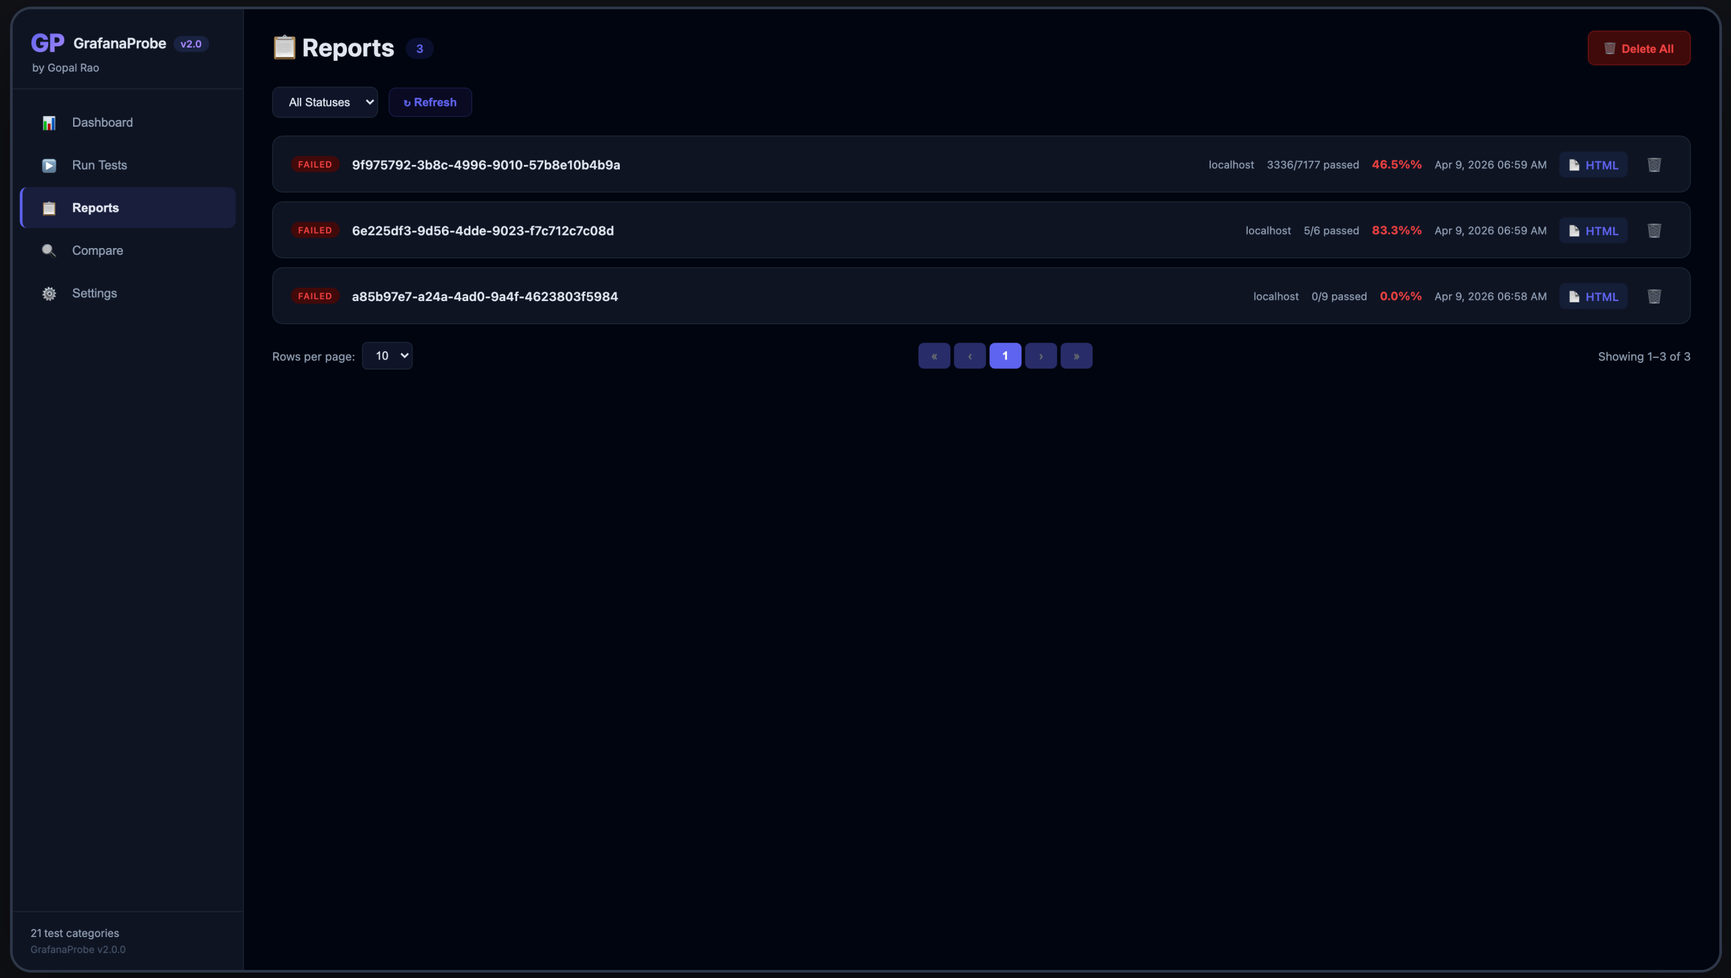
Live progress. Real-time.

WebSocket streams every test result as it completes — no waiting, no polling.



HTML reports.
Clickable Grafana links.

Every dashboard, alert, and plugin is one click away from the actual Grafana page.



Three Test Engines · One UI

K6 + Playwright + JMeter

API tests, browser automation, and performance load testing — all from the same dashboard.

⚡

K6 API Tests

17 categories · 7,000+ tests

🎭

Playwright E2E

12 suites · Real Chromium

🔥

JMeter Performance

18 plans · p50/p95/p99

Architecture

Simple. Self-contained.

React Frontend

Port 3001
5 pages · Live WebSocket
Dark theme · Recharts

Node.js Backend

Port 4000
Express + Socket.IO
SQLite + Winston

Grafana

9.x — 12.x supported
Multi-org · Auto-fallback
50+ API endpoints

🐳 **Docker** | 📦 **Podman** | ⚙️ **CI/CD CLI** | 🪟 **Windows ✓**

Bonus Features

AI failure analysis.
Dependency graphs.

Failures get analyzed by OpenAI or Claude — root cause + fix in plain English.

The dependency graph maps every datasource → dashboard → panel → plugin relationship so you know exactly what breaks when you upgrade.

🤖

AI Analysis
OpenAI / Claude integration

🕸️

Dependency Graph
5,665+ edges on real instances

🔄

Impact Analysis
Pre-upgrade blast radius

Try it now.
