V2.0 · OPEN SOURCE

Grafana Probe

Validate every layer of your Grafana stack.

17 test categories · 3 engines · 1 click

@Gopal Rao

Swipe →

Grafana upgrades break things silently.

A failed plugin. A broken datasource. A missing variable. You don't find out until 3 AM when your dashboards are dark.

📉

Broken Panels
Plugins fail silently mid-render

🚨

Stale Data
Pipelines down with no alert

🔥

Cascade Failures
One bad config breaks N dashboards

🌙

3 AM Pages
Silent failures wake you up

17 Test Categories. One Command.

Auto-discovers your Grafana instance and validates every layer.

- ✓ API Health, Datasources, Folders, Dashboards, Panels
- ✓ Alerts, Plugins, App Plugins, Users & RBAC
- ✓ Links, Annotations, Query Latency, Config Audit
- ✓ Provisioning, Data Freshness, Capacity, K8s Dashboards
